TSDS Upgrade Project: PEIMS Fall Test Cases

PEIMS Fall Test Case Guidance

General Guidance

Comparison between the TSDS Parallel environment and the TSDS Production XML environment.

- Verify with your source system vendor(s) that they have transmitted all necessary domain and entity data to your Landing Zone individual operational data store (IODS) for the data collection you are parallel testing. The domain and entity information can be found at the following link: Data Collection Documentation | TSDS (texasstudentdatasystem.org)
- Correct the data in your source system software for any relevant Level 1.5 filters that are preventing data from being loaded into the TSDS Parallel environment.
  - This may also include mapping local descriptor values in the TSDS Data Management Center (DMC) application.
- Schedule Level 2 DMC Validations for the data collection you are parallel testing.
  - Return the next business day to review the fatal, special warning, and warning validation rules that are triggered compared to the validations in the TSDS Parallel environment PEIMS application.
- Run a data promotion in both environments.
  - Compare the record count for each category/subcategory on the Prepare/Finalize Submission page.
- Perform data validations in both environments.
  - Review the fatal, special warning, and warning validation rules that are triggered in each environment for differences.
- Generate the same set of reports in both environments.
  - Compare the report content for any differences in the reports, such as missing student or campus data or inconsistencies between the information displayed.
  - Where applicable, verify data across multiple campuses using the 'By Campus' report parameter option.
  - Reminder – reports generated in the TSDS Parallel environment will include "_Parallel" in the file name and a watermark at the bottom of each page of the report.
- Data Search
  - Compare the data search results between the two environments.
- Data Element Summary - compare counts.
  - Compare the data element summary results between the two environments.
- Data Retrieval – compare data results.
  - Compare the data retrieval results between the two environments.

Test Case 1 – Organization – Local Education Agency (Programs of Study)

Step 1: Complete all steps listed in the General Guidance section.

Step 2: Check to ensure LEA data are promoted.

Step 3: Run the PDM1-116-007 *Career and Technical Education Programs of Study* report.

Step 4: For logic regarding promotion of LEA data, see the TSDS Upgrade Project:
- PEIMS Fall Promotion Logic document located at the following link:
  Data Collection Documentation | TSDS (texasstudentdatasystem.org)

Step 5: Verify the following are being reported accurately:
- Ensure the Program of Study Codes are displayed as reported.
- Program of Study description is correct.
- Totals are correct for State Level Programs, Region Level Programs and Total Programs of Study.
